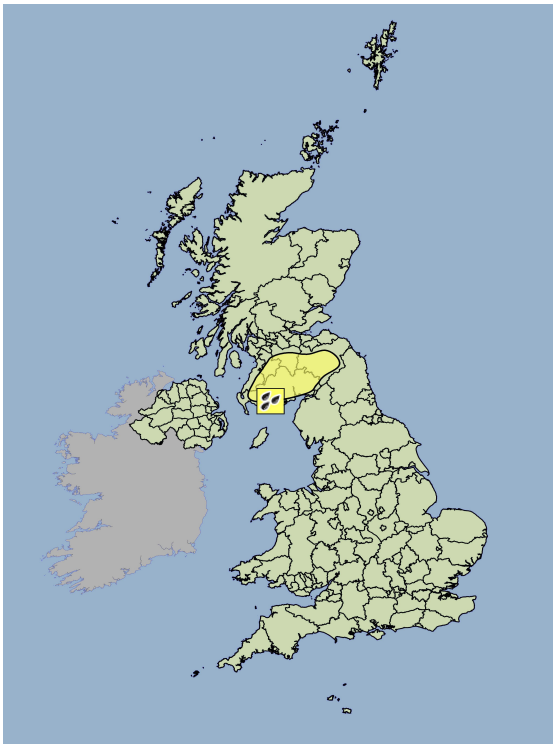
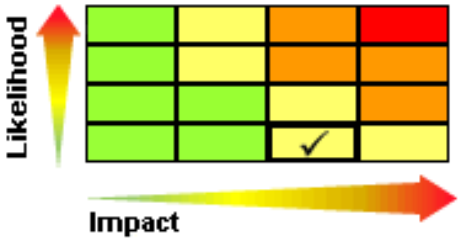
National Severe Weather Warning Service





Chief Forecasters Assessment
An active cold will move southeast across the area during Friday bringing persistent and at times heavy rain. Around 20 mm are expected quite widely, with 40 mm possible locally within a 6 to 12 hour period. Rainfall amounts remain uncertain, but given the saturated ground there is an enhanced risk of flooding.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **08:00 on Fri, 05th Feb 2016** until **18:00 on Fri, 05th Feb 2016**

Rain is expected to become heavy for a time over southwest Scotland during Friday before clearing southeastwards during the evening. Please be aware that, due to the saturated ground, further localised flooding and disruption to travel are possible.

The warning has been updated to bring forward both start and end times.
